

Historic, Archive Document

Do not assume content reflects current scientific knowledge, policies, or practices.

This image shows a single page from a notebook or ledger. The page is white with faint, evenly spaced horizontal lines running across it. There are no vertical margin lines, and the page is completely blank except for the ruling. A slight shadow is visible along the left edge, suggesting it's part of a bound volume.

PACKING will be charged additional on all orders which require boxing or baling for safe delivery, but these charges are nominal, usually from \$1.50 to \$3.00 per thousand trees (less quantity in proportion), according to size and variety, just sufficient to cover the actual cost of material.

C. O. D. SHIPMENTS are not advisable—you must pay two charges, one on the package and another on the money. We do not, in any case, ship C. O. D. unless one-fourth or more cash is received before shipment.

Please give us the names of those interested in trees or plants.

Yellow Cecile Brunner. Pol. An exquisite miniature rose	50	4.50

SMALL FRUIT PLANTS

Few realize the amount of delicious fruit which can be grown in a small space. Every home with a back yard of ordinary size can and should have its own supply of the finest, by planting Loganberries and Cory Thornless Blackberries to be trained along the fences; then ten or a dozen plants each of Gooseberries, Currants, Raspberries, etc., require very little space, cost little to buy and require little care--but PRODUCE WONDERFULLY.

And don't overlook an Asparagus bed. For home purposes the plants may be set 2x2 feet, so a space 20x20 feet, requiring only 100 plants at a cost of \$2.00, will give a good supply the second year and thereafter all any one family can use.
